18. **Lightning:** Baseball Ontario and the Hamilton District Baseball Association follow Environment Canada’s guidelines with respect to lightning safety.

### **When Thunder Roars, Go Indoors!**

**If you can hear thunder, you can be hit by lightning. Take shelter immediately. If you cannot find a sturdy, fully enclosed building with wiring and plumbing, get into a metal-roofed vehicle. Stay inside for 30 minutes after the last rumble of thunder.**

**For all regular season house-league games, any games stopped (after the official game time) under the OBA Thunder Policy, would be considered over; and, for other times, the OBA Thunder Policy is to be applied.**

Direct strikes are responsible for only 50% of lightning-related deaths and injuries. Two other types of hazardous phenomena are caused by lightning. Ground current and side flash account for 60-80% of lightning-related injuries and deaths. A ground current is set up when lightning hits the ground, spreads out and sends a current through a victim. Side splash occurs when lightning hits a tall object, travels partly down the object and then jumps to a nearby victim.
